Life Events Options

Life Events permit employees to initiate changes to benefits which involve themselves and their dependents.

After selecting the **Benefit Details** tile from the **Employee Self Service** dashboard, click the **Life Event** option from the left side panel to display the **Life Event** page.

Select the type of **Life Event** to process from the list. The life event must be completed within 31 days of the event. If more than 31 days has passed, the employee will not be allowed to enter a **Life Event**, and will need to wait until the next Open Enrollment period to make changes to their benefits.

After selecting the **Life Event**, enter the ***As Of** date and click the **Start Life Event** button. (**Please note:** The *As Of date must be the *exact* date of the birth, marriage, etc.) A list of steps to be completed will appear on the left, and Previous and Next buttons will appear in the top right corner for navigation. (Please note that all supporting documents must be available for upload prior to completion of the **Life Event**.) The event may be exited and the progress saved so it can be completed at a later time. However, the employee will not be able to begin another **Life Event** until the current event, which will show as being in progress, is completed.

*Note: Only one **Life Event** at a time is allowed. To cancel a **Life Event**, click the **Continue Life Event** button, then click the **Action List** (3 vertical dots - upper right corner), and select **Cancel**.*
