## CCSD Security and Google Meet

In order to prevent uninvited guests from gaining access, the **CCSD Google Meet system** (formerly known as “Google Hangouts Meet”) is configured so that participants **cannot** automatically enter a Meet *unless* they are within the **nv.ccsd.net** domain. Users outside the domain *can*, however, request to enter *if* they have the meeting link. This is why it is important for presenters to be careful to share links to **only** invited participants.

Additionally, accounts outside of the nv.ccsd.net domain may request to join a CCSD Google Meet, but must be approved by the presenter before they can be admitted. Again, care should be taken by the presenter to share the meeting link **only** to invited participants. If a meeting Organizer rejects a “knock” **twice** from the same participant, the participant will be blocked from knocking again. This means the Organizer won’t see any additional knocks from that user for the duration of the meeting.

### *WARNING: Inviting Other CCSD Staff to Google Meets with Students*

If you intend to invite other CCSD staff members (such as an administrator, a co-teacher, an aide, etc.) to *any* Meet that you are hosting with students, it is **crucial** to remember that you **must enter the Meet before any other staff member**. This means that you must be the **first** staff member to **click the link for the Meet**.

If another CCSD staff member accesses the Meet before you do:

- A)** The other staff member will be given **Organizer rights** (the ability to mute/remove participants, access to Host controls, etc.), therefore **taking Organizer rights away from you** for the duration of the meeting; **AND**
- B)** Student accounts will be able to join as soon as the other staff member is present (even if you have not yet entered the Meet).

This means that whoever is the **first** staff member to reach the Google Meet **pre-entry screen** (as shown) will receive Organizer rights, even if they have not yet clicked on **Join now** to enter the Meet. It is important to communicate to other invited staff members that they should **not** access the Meet link until you instruct them to do so.

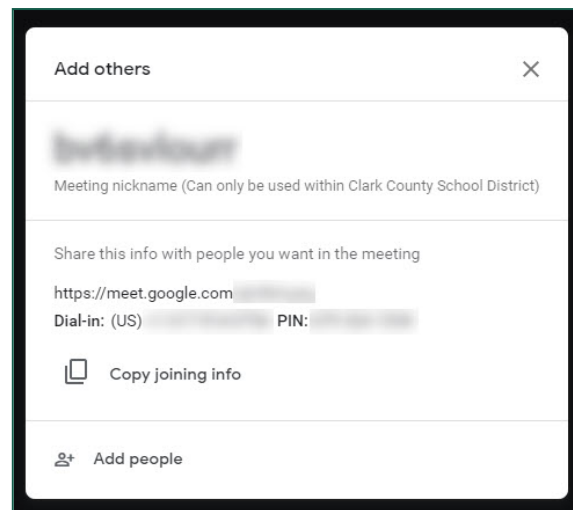

## Creating a Meet in Google Classroom

### Overview

**Google Classroom** allows you to generate a Meet link for a specific Class that becomes visible to invited students in two different areas: The Class's **Stream** tab and the **Classwork** tab (under the **Meet** icon).

The benefit of creating and sharing a Meet link via Google Classroom is that students *cannot* join the Meet without you there, meaning they cannot join *before* you enter the Meet, or rejoin *after* you have left the Meet.

A **dial-in number** and **PIN** are also automatically generated and will appear after you, the Organizer, enter the Meet. This information can be shared with students who may not have access to a device.

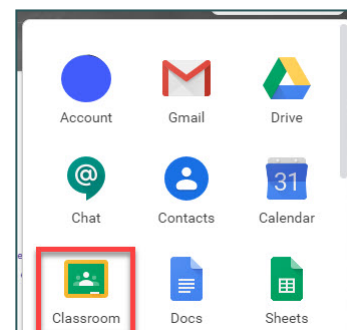

### Adding a Meet Link to Your Classroom

1. After logging into your District Gmail account, click on the **App Switcher** in the top right corner.

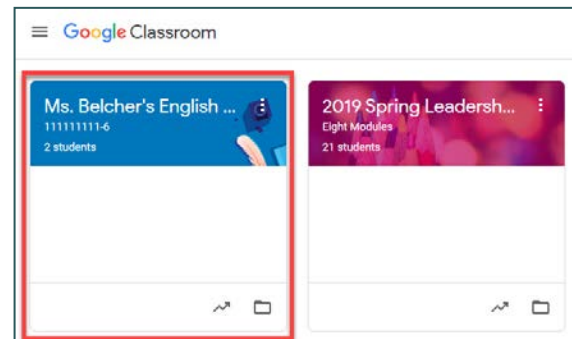

2. From the available apps that appear, locate and click on **Classroom**.

\* **Please note:** The location of your Classroom app within the app switcher varies based on your Google preferences. You can click and drag apps to change the order in which they appear.

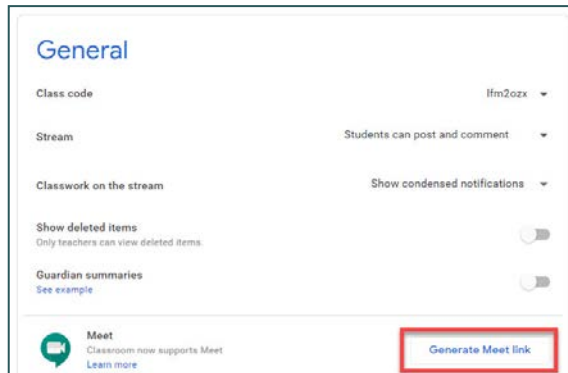

3. The Google Classroom opens in a new tab.  
Select the desired **Class**.

4. After the Class is open, click on the **Settings (gear)** icon in the top right corner.

5. In the General area, click **Generate Meet link**.

6. A **Meet** link automatically appears, and the **Visible to students** option becomes modifiable. Leave the toggle set to **ON**. This ensures that students in the Class can view and access the link.

7. Click **Save** in the top right corner.

8. After you are brought back to the Class, there are two ways to access the Meet:

A) From the **Stream** tab of the Class, click the **Meet** link.

B) From the **Classwork** tab of the class, click the **Meet** icon.

## Using Ad Hoc Meets in Google

### Overview

Staff may also create an **“Ad Hoc” Google Meet**. This option ensures that students do not join the meet without the Organizer first being present. Just as with Google Meets that are created via Google Classroom, a dial-in phone number and PIN are generated once the Organizer joins the Ad Hoc Meet.

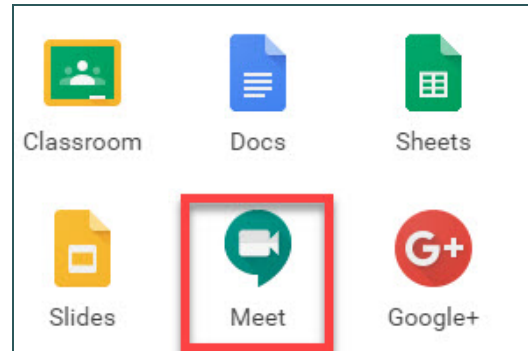

### Creating an Ad Hoc Meet

1. After logging into your District Gmail account, click on the **App Switcher** in the top right corner.

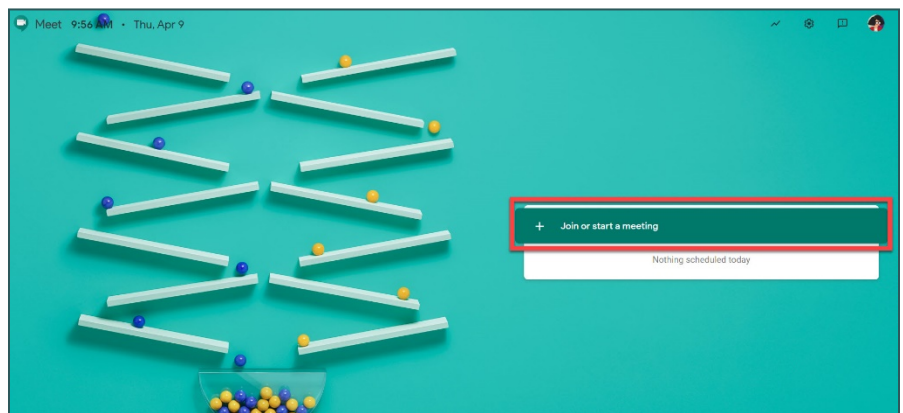

2. From the available apps that appear, locate and click on **Meet**.

*\* **Please note:** Just as with the Classroom app, the location of your Meet app within the App Switcher varies based on your preferences in Google.*

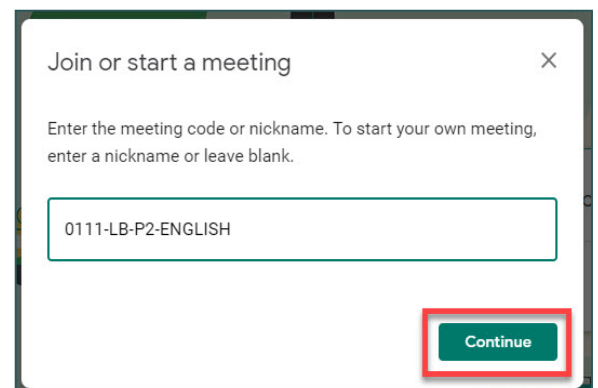

3. The Meet app opens in a new tab. Click **+ Join or start a meeting**.

*\* **Please note:** The background artwork you see in the Meet tab will likely be different than the one shown in the screenshot above. This is because Google changes the artwork for this tab on a regular basis.*

4. You are brought to a page asking you to enter a nickname if desired. Enter a **nickname** for the Meet. To avoid confusion with Meets set up by other District users, a useful format for your nickname is: **SCHOOL CODE-YOUR INITIALS-PERIOD-COURSE NAME**. Using a more generic name risks your students accidentally joining the wrong Meet.

The nickname prevents reuse of the meeting, so students are unable to rejoin the call if a teacher (Organizer) leaves the meeting last. Click **Continue** when finished.

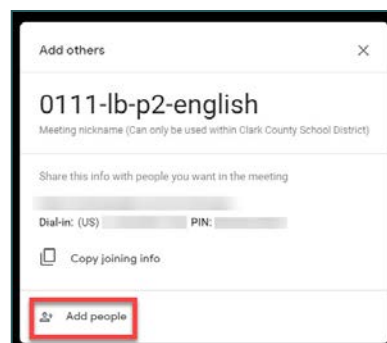

5. On the page that follows, the camera display, as well as verbiage stating that the meeting is ready, will appear. Click **Join Now**.

\* **Please note:** No matter what casing you enter in your nickname, it will appear in **all lowercase letters** on this screen.

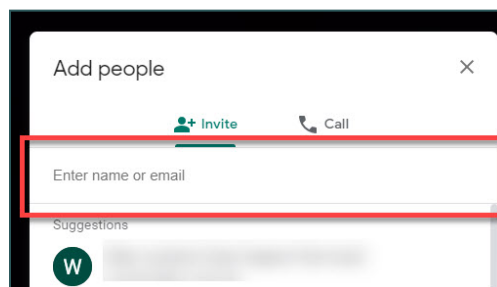

6. You are brought into the meeting and a window appears asking if you would like to add others to the meeting. Click **Add people**.

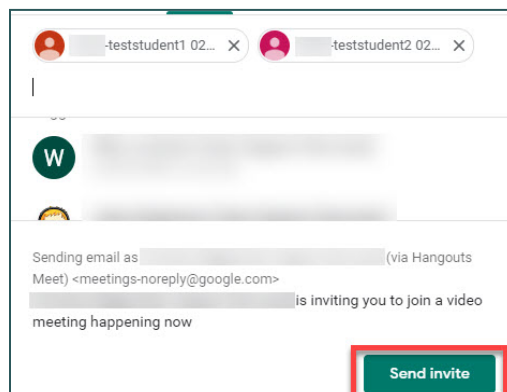

7. In the window that follows, use the **Search bar** to enter student names or email addresses and add them to the Meet.

\* **Please note:** Contact Labels **cannot** be entered in the Search bar in order to add students. You must search for each name or email address individually.

8. Once the names of all desired participants have been entered, click on **Send invite**. This generates an automatic email to each of the District Gmail accounts added with a link to click to join the current meeting.

## Scheduling a Google Meet

### Overview

You can use your **Google Calendar** to schedule a Google Meet for a specific date and time, and then invite others to join the event. This is beneficial if you would like the participants of the Meet to have access to an attachment (such as a Word document or PowerPoint slideshow) because the Create Event window gives you the ability to add attachments.

**Please note:** When creating a Google Meet via the Google Calendar, the link to join the Meet becomes ***accessible by anyone invited to the Event***, and therefore can be easily shared (i.e. copied, pasted, and sent to others). It also does not “lock down” the meeting, meaning that users can enter even when the Organizer has not entered. This is why it is recommended to use Meets in Google Calendar for adult-to-adult video conferences ***only***. Please **do not** utilize this method for Meets with students. It is recommended that teachers planning to host a Meet with students utilize the [Creating a Meet in Google Classroom](#) or the [Creating an Ad Hoc Meet](#) option.

### Creating a Calendar Event with Video Conferencing

1. After logging into your District Gmail account, click on the **App Switcher** in the top right corner.

2. From the available apps that appear, locate and click on **Calendar**.

*\* **Please note:** The location of your Calendar app within the App Switcher varies based on your Google preferences.*

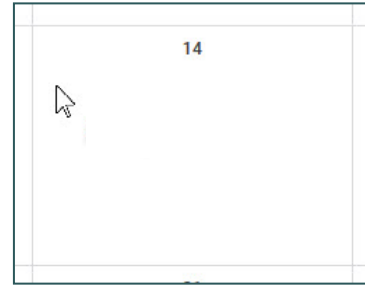

3. The Google Calendar opens in a new tab. To create a new Event, either:

**A)** Click the **+ Create** button on the left; **OR**

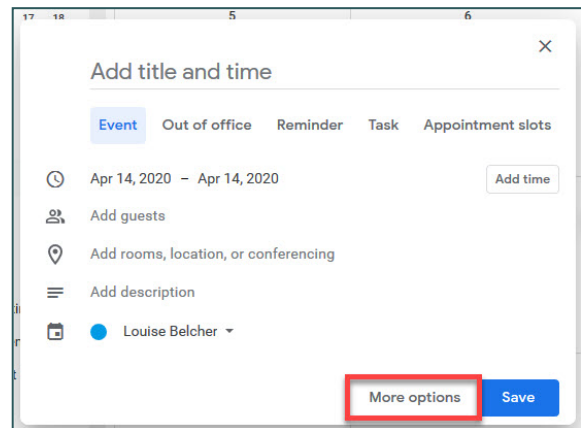

**B)** Click the date you wish to schedule the Google Meet to open a new Event window.

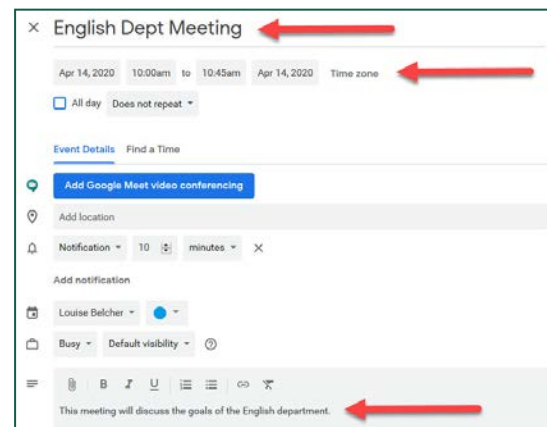

*\*Please note: If you **single-click** in the Calendar, continue to **Step 4**. If you **double-click**, go to **Step 5**.*

4. After the new Event window opens, click **More options** in order to open a more detailed view of the Event.

5. Fill out all desired and necessary information, including the Event title, the correct Start and End Dates, the correct Start and End Times (which becomes modifiable by unchecking the **All day** box), and a description, if desired.

By using the **Add attachment (paperclip)** icon, you can add any attachments that will then be accessible by your invited participants.

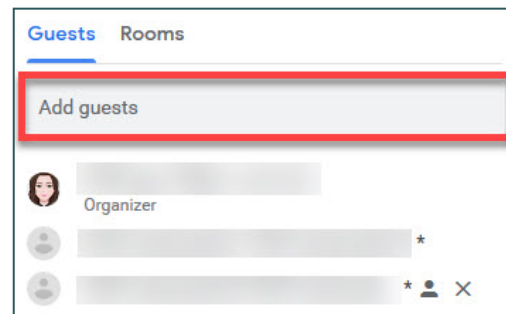

*\*Please note: It is important for you to ensure the Event is being added to the **correct Calendar** since you may have access to more than one District Google Calendar in your District Gmail account.*

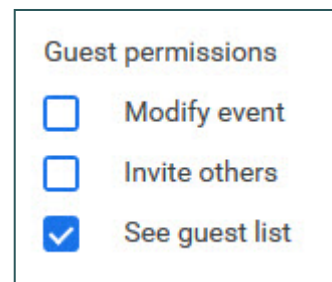

6. After all other pertinent information has been entered in the Event, click the **Add Google Meet video conferencing** button. This generates a link to the video call after the Event is saved.

7. To invite others to the Event, click into the **Add guests** search bar and enter the names or emails of your desired participants. Select the desired names as they appear in the list of suggestions.

8. In the **Guest permissions** area, make sure that both **Modify event** and **Invite others** are both *unchecked*. Giving students rights to modify the Event would allow them to change vital information (such as the date and time), and giving them rights to invite others would allow them to add other participants to the guest list. The option to **See guest list** allows participants to see the guest list.

9. Click **Save** in the top right corner.

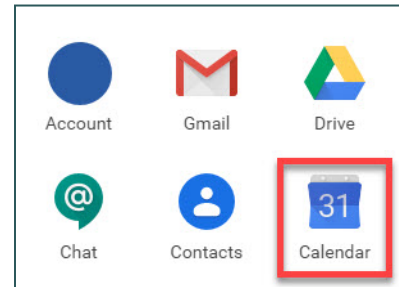

10. A dialog box appears asking if you would like to send email invitations to all invited guests. Click **Send**.

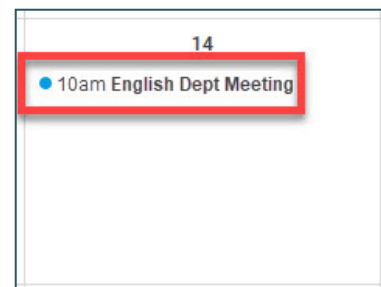

## Joining a Google Meet from the Calendar

When a Google Meet is created from a Calendar Event, it is possible to access that meeting from the Calendar.

1. Open the **Calendar app** via the **App Switcher**.

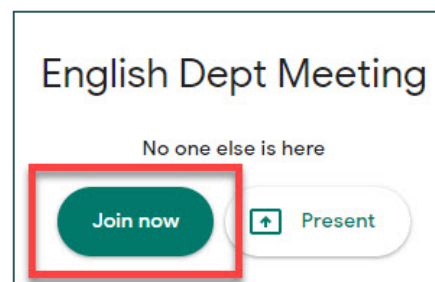

2. Open the Event to view details.

3. Click **Join with Google Meet** to access in a new tab. (You can also join the Meet by calling the phone number given under the **Join by phone** heading.)

4. Select **Join now** to enter the meeting.

## Host Controls

### Overview

**Host Controls** are settings that allow for additional security in Meet sessions. These can be accessed during a Google Meet either via the **People** icon in the upper right corner (for **Present Lock/Chat Lock**), or by clicking the new **Host Controls** icon that appears in the lower left corner (next to the meeting name). **Quick Access** can *only* be accessed by clicking the Host Controls icon.

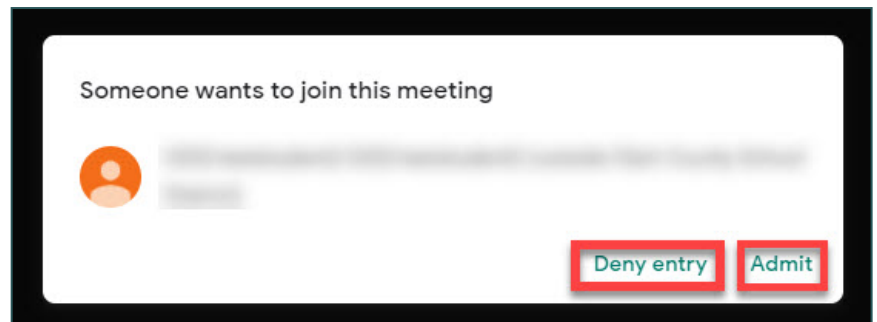

An important thing to note is that these Host Controls are accessible via the browser version of Google Meet *only*, and *cannot* be accessed via mobile devices.

### Quick Access

In each Google Meet that you host, **Quick Access** is *enabled* by default. However, *disabling* this feature can ensure a higher level of security in your meetings. When disabled, Google requires all uninvited users (even those within the nv.ccsd.net domain) to “knock” before being admitted to a Google Meet (essentially functioning as a waiting room to the Meet).

When a user knocks at a Meet that you are hosting, you will be notified via a dialog box with the name and email address of the user that is trying to join. From this screen, you can either **Admit** the user (allowing them to join the Meet) or **Deny entry**. Once entry is denied, the user will receive a notification that they *cannot* join the Meet.

After two denials, an uninvited participant will no longer be able to knock and request access to that particular Google Meet. However, this functionality does *not* currently apply to users who are knocking via dial-in (phone), so their knocks will still need to be denied.

However, the requirement to knock does *not* apply to:

- A) Participants who have been invited via **calendar invite** (see **Scheduling a Google Meet** for instructions); **OR**

**B)** Participants who have been invited in-meeting by you, the Organizer (see **Using Ad Hoc Meets** for instructions).

The knocking rule also applies to **dial-in users** who are attempting to join the Meet via phone. During the Meet, only you (the Organizer) will be able to dial out.

If a participant (such as a student from your class) shares the Meet information with an uninvited participant (such as a CCSD student that is *not* in your class), the new participant will **still be required to knock**, and therefore cannot access the Meet without permission.

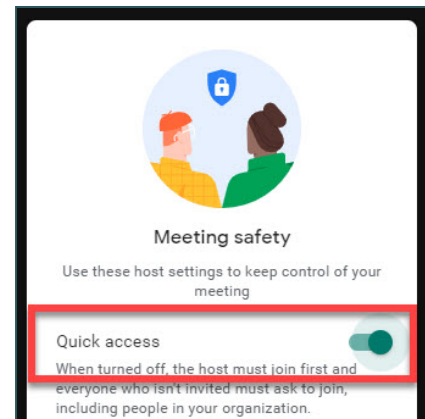

In addition to these security settings, the Access Lock feature ensures that users **cannot** join the Meet until you (the Organizer) have entered. If invited participants attempt to join before you have entered, they will receive the following error message: **“Waiting for the Host to Join: The meeting will start as soon as the host has joined.”**

To toggle this option on or off while in a meeting:

1. Click the **Host Controls** icon in the lower left corner.

2. A **Quick Access** toggle appears and is automatically set to **ON**. To toggle it off, click the “switch” next to **Quick Access**.

### *Best Practices for Disabling Quick Access*

---

Because Quick Access is always toggled **ON** by default, there are a number of options for utilizing the feature to heighten the security of your Google Meets.

If you are starting a Meet via an **Ad Hoc Meet (with a Nickname)** or via **Google Classroom**:

**A)** The first option is to turn off Quick Access *immediately* after entering the Meet and then manually invite each student by clicking the **People** icon (in the upper right corner) and then selecting **Add people** to send invites to each student.

**B)** The second option is to wait until all invited students have joined the Meet and **then** turn off Quick Access in order to “lock” the meeting and prevent any uninvited users from entering.

The Quick Access option can also be toggled off in a **scheduled Meet** (one that has been created as an event on **Google Calendar**). You should *immediately* enter the Meet after creating the event, turn off Quick Access, and then close the Meet. After this, students will **not** be able to access the Meet without you first being present.

## Present Lock

The **Present Lock** setting enables you to toggle the **Share your screen** from within the Meet.

When **enabled**, anyone in the Meet can present. (This is the default setting for all Google Meets.) However, when **disabled**, only you (the Organizer) can present during the Meet.

To toggle this option on or off while in a meeting:

1. Click the **People** icon in the upper right corner.

2. Click the **Host controls** button that appears near the top of the panel.

3. Under the LET EVERYONE heading, the Present Lock (which appears as **Share their screen**) is automatically set to **ON**. To toggle it off, click the “switch” next to **Share their screen**. With this option disabled, other participants in the Meet will no longer be able to view or access the **Present Now** button.

## Chat Lock

With **Chat Lock**, you can manage the **Participants Can Send Chat Messages** setting from *within* the Meet that you are hosting.

When this setting is toggled **on**, anyone in the Meet can send messages in the Chat area. When it is toggled **off**, only you (the Organizer) may post messages in the Chat area for other

participants to view. However, toggling this option off does **not** hide any historical chat messages (i.e. if the setting was toggled on at the beginning of the Meet and messages were sent before it was toggled off).

To toggle this option on or off while in a meeting:

1. Click the **People** icon in the upper right corner.

2. Click the **Host controls** button that appears near the top of the panel.

3. Under the LET EVERYONE heading, the Chat Lock (which appears as **Send chat messages**) is automatically set to **ON**. To toggle it off, click the “switch” next to **Send chat messages**. With this option disabled, the *Send a message to everyone* option in the Chat area will be grayed out. **However**, any chats sent prior to this option being toggled off will still be visible in the Chat area.

*\* **Please note:** The Chat Lock toggle can also be accessed by clicking the **Chat** icon in the upper right corner.*

## Managing Participants in a Google Meet

### Overview

Additionally, after adding participants to a Google Meet, you (the Organizer) have a number of controls which allow you to manage participants during the meeting. These controls are useful for ensuring that there are limited interruptions and/or distractions during your presentation.

To access these controls during a meeting, click the **People** icon in the top right corner of the screen. This expands a panel on the right and displays all participants in the current meeting.

## Participant Controls

**NOTE:** The following controls (aside from **Pin**) will not be available to you unless you are the **Organizer** (creator) of the Google Meet. If you are a participant (i.e. invited to the Meet by another Google user), you will **not** have access to the **Mute** or **Remove** controls.

1. To view the available controls for a specific participant in the meeting, click on the **drop-down arrow** next to the participant's name in the People panel on the right.

2. To **Pin** a participant's screen (which means that their camera feed or thumbnail image will be "pinned" as the main screen from your view in the meeting), click on the **Pin (thumbtack)** icon. (**Note:** This does *not* pin the screen for all participants.)

3. To **Mute** a participant's microphone, click the **Mute (microphone)** icon. However, for security reasons, you cannot *unmute* a participant once they are muted. The participant will need to unmute themselves.

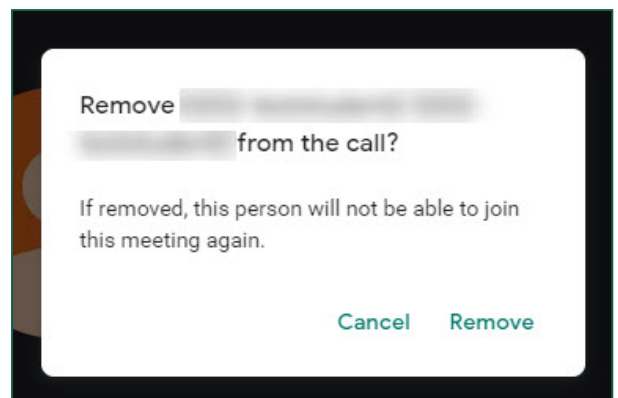

4. To **Remove** a participant from the current meeting, click the **Remove (minus)** icon. This directs the participant to a screen informing them that they have been removed from the meeting.

## Re-adding a Removed Participant

When a participant is removed from a Google Meet by an Organizer, a dialog box appears to inform the Organizer that the participant **will not be able to rejoin the Meet**.

As a result, the participant will receive a notification that they have been removed from the Meet and cannot rejoin. However, the host can still add the student back to the meeting if desired by manually sending them a new invitation from the Meet.

To do this:

1. After the participant has been removed, click the **People** icon in the upper right corner.

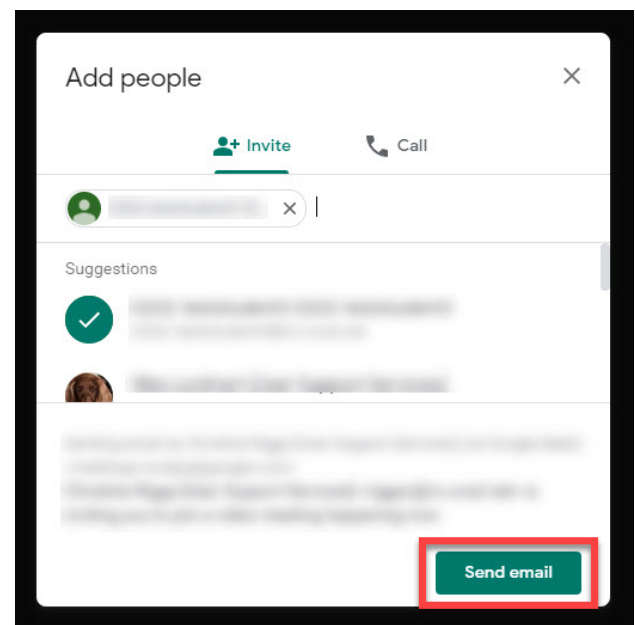

2. Click the **Add people** button.

3. In the **Add people** window that appears, begin typing the name or email address of the participant, select their account, and then click **Send email**.

4. After the invite has sent, the participant can click on the link that was emailed to them in order to rejoin the meeting.

## Presenting in a Google Meet

### Overview

While hosting a Meet in Google, you have the ability to share **your entire screen**, a **specific window**, or a **specific tab in Chrome** using the **Present now** feature.

It is best to use the **entire screen** option if/when you plan to present more than one window during a meeting. For example, if you are presenting a screen while in Infinite Campus and attempt to open a PDF file while in the Meet, there are specific types of Infinite Campus files (such as IEPs) that will open in a *new window* (using Adobe) rather than in the Infinite Campus screen. If you did this while *only* sharing a window, then your participants would not be able to see the PDF opening in Adobe. **However**, it is vital to remember that, when sharing your entire screen, **any windows that you open while sharing will become visible** to your participants.

Therefore, you should ensure that you **do not** have any private or sensitive information open on your computer before selecting this option.

The option to share a **specific window** is ideal when sharing a single webpage, PDF file, Word document, etc. Again, it's important to note that this option will only allow you to share **one window at a time**, so any item(s) that open in a new window will **not** be visible to your participants if/when this option is selected. To share a new window, you would need to stop sharing your current window, and then use the **Present now** button to choose a new window to share.

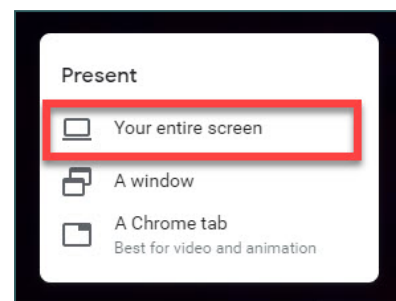

If you'd like to share web content that includes video and/or audio, the best presenting option is to **share a tab in Chrome**. This gives you the ability to select any tabs you have open in Google Chrome (even if you have multiple instances of Chrome open) to present to your participants. This also allows you to enable **sharing computer audio** while presenting so that your participants can hear your computer's audio through their own device's audio system instead of through your microphone.

## *Sharing Your Entire Screen*

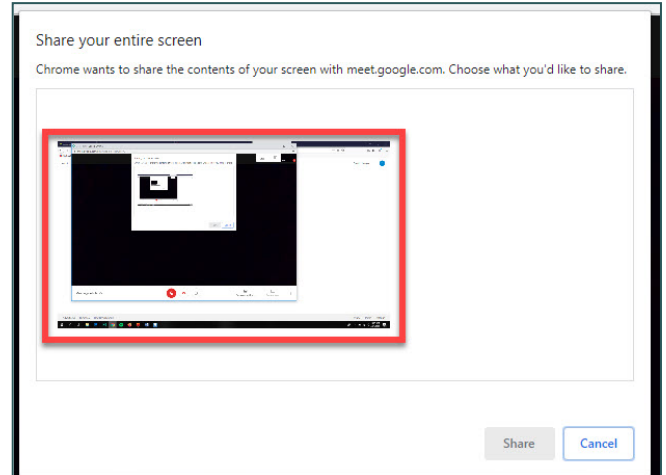

1. While hosting a meeting (using one of the methods outlined in this document), click the **Present now** button at the bottom of the screen.

2. From the list that appears, select **Your Entire Screen**.

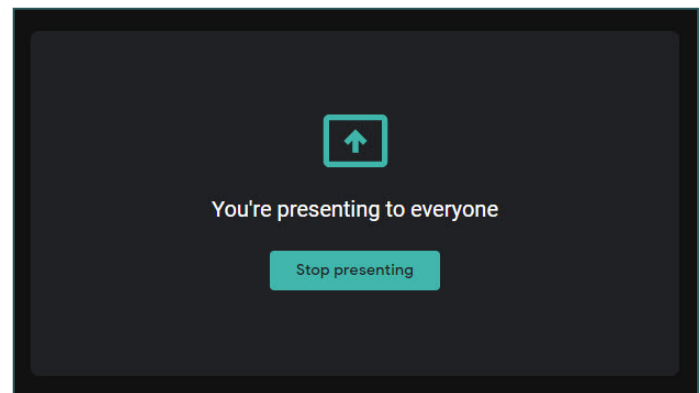

3. A dialog box appears to give you screen-sharing options. If you have *multiple* screens (more than one monitor), all of them will display. Select the screen you wish to share by single-clicking it.

4. Click **Share**.

5. A window appears indicating that you are now **presenting your screen to everyone** in the meeting. You may now select the window, file, etc. that you wish to present to your participants.

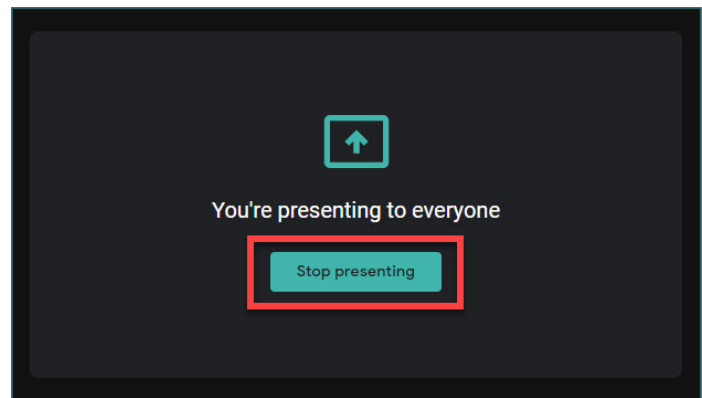

If/when you navigate away from the Google Meet window (i.e. to select a different window to share), an additional notification appears in the bottom right corner of the screen to inform you that you're still sharing, as well as to provide a link to return to the Meet screen.

*\* **Please note:** While you are sharing, any window, file, or tab that you open **will become visible** to **all** of your participants. Please exercise caution while sharing your entire screen.*

6. After you've finished presenting, open the Google Meet screen and click **Stop presenting**.

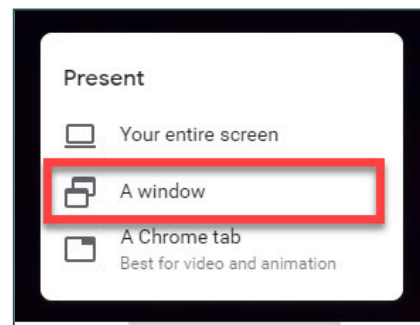

## *Sharing a Specific Window*

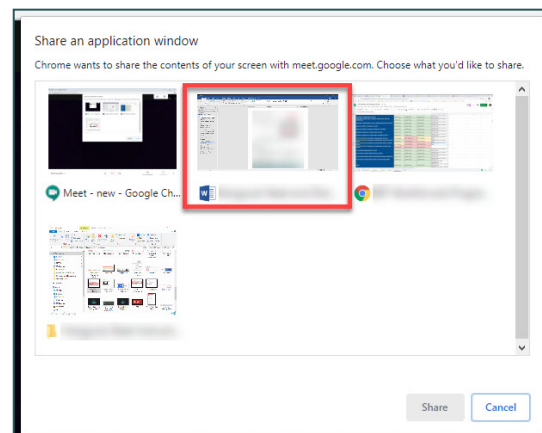

1. While hosting a meeting (using one of the methods outlined in this document), click the **Present now** button at the bottom of the screen.

2. From the list that appears, select **A window**.

3. A dialog box appears to give you window-sharing options. Any windows that you currently have open will display. Select the window you wish to share by single-clicking it.

4. Click **Share**.

5. You will be redirected to the window that you selected to share. At the bottom of the screen, a dialog box appears indicating that you are sharing the selected window.

\* **Please note:** If you open or activate another window while presenting, it **will not** be visible to your participants because you chose only to share **one** window.

6. After you've finished sharing, you have two options to stop presenting:

**A)** Click the **Stop sharing** button available in the window that you are sharing.

**B)** Open the Google Meet screen and click **Stop presenting**.

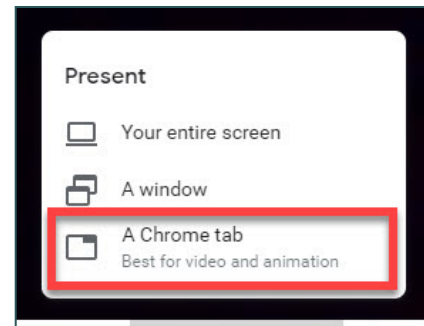

## Sharing a Tab in Chrome

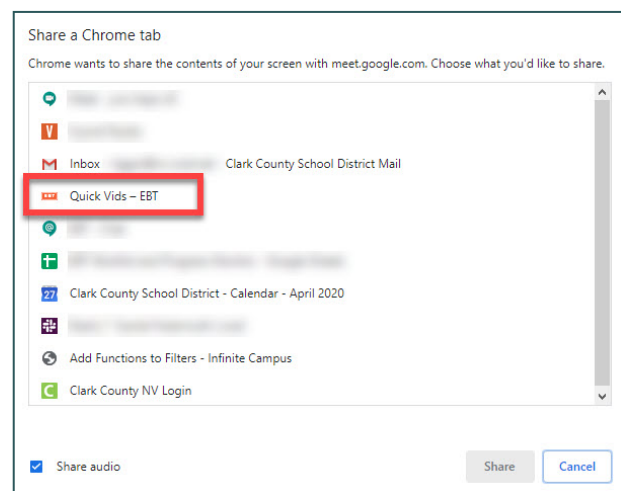

1. While hosting a meeting (using one of the methods outlined in this document), click the **Present now** button at the bottom of the screen.

2. From the list that appears, select **A Chrome tab**.

3. A dialog window appears to give you tab-sharing options. Even if you have more than one instance of Google Chrome open, **all** available tabs will display in the list. Select the tab you wish to share by single-clicking it.

4. If you are presenting web content that includes audio, ensure that the **Share audio** checkbox in the bottom left corner is selected.

5. Click **Share**.

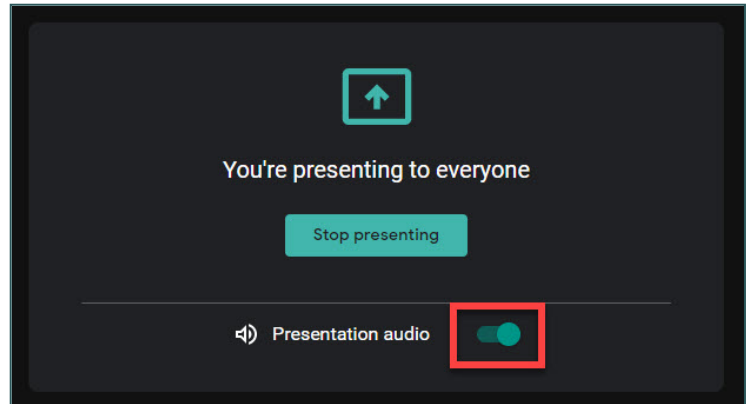

6. You will be redirected to the Chrome tab that you selected to share. In the top left corner of the screen, a dialog box appears indicating that you are sharing the selected tab.

7. If at any point you would like to disable computer audio while sharing, return to the Google Meet screen and “switch off” the **Presentation audio** toggle.

8. After you've finished sharing, you have three options to stop presenting:

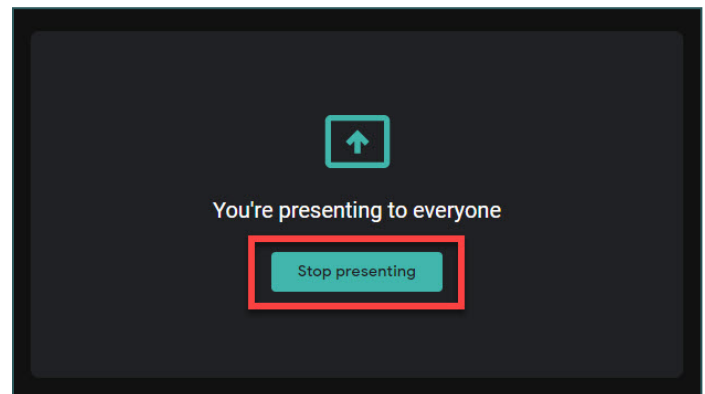

**A)** Click the **Stop** button available in the tab that you are sharing.

**B)** Open the Google Meet screen and click the **Stop** button in the top left corner of the screen.

**C)** Open the Google Meet screen and click **Stop presenting**.

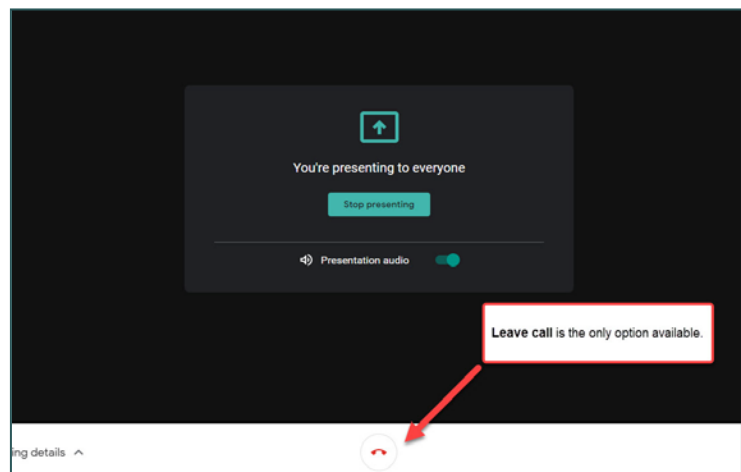

## *WARNING: Presenting Before Joining a Google Meet*

Although you have the ability to select **Present** instead of **Join now** at the entry page of a Google Meet (using any of the methods outlined in this document), this is **not** recommended by CCSD.

If you choose to present before you enter a Meet, you will have **all three** presenting options (share entire screen, share a specific window, or share a Chrome tab) available in **one** window, and the **Share audio** checkbox will appear for any option that is selected.

**However**, once you begin presenting through this method, you will **not** have microphone or camera access while hosting the meeting. So, although your participants will be able to see what you are presenting to them, they will not be able to see or hear you during the meeting. The only option you will have is to **leave the meeting** altogether.

This is also not an ideal way to present because, conversely, you will not be able to see or hear from your participants while presenting, either.

## *Pre-recording a Google Meet*

### *Overview*

In order to protect student information privacy in alignment with the Federal Education Rights and Privacy Act (FERPA), recording a live Google Meet session with students present is **only** permitted when certain conditions are met. Sharing a recorded Meet that contains personally identifiable student information to anyone **outside of the class** is considered a direct violation

of FERPA. In addition, educators must attempt to obtain an ***Authorization for Release of Education records for every student.***

Alternatively, Google provides you with the ability to pre-record a Google Meet with no participants so that the recording can be saved to Google Drive and shared with students at a later time (asynchronously).

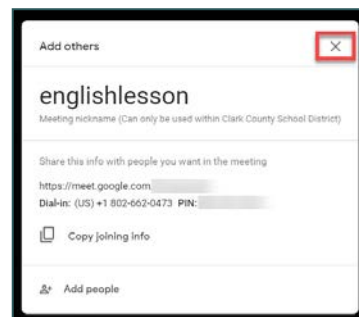

For more information on how FERPA impacts synchronous/asynchronous sessions, details about how parent/guardians can submit authorization via Infinite Campus, and specific guidelines on when/how to record a Google Meet with students, see **Section II Distance Education Information and Expectations** of the **CCSD Reopening Our Schools Implementation Guide**.

## *Recording a Meeting*

**NOTE:** If you plan to use the Present function to share your screen while recording, please ensure that any items you plan to share (such as a slideshow, document, webpage, etc.) are open *prior* to beginning the recording process.

1. Repeat **Steps 1 through 5** given in the [Creating an Ad Hoc Meet](#) section in order to open the Meet tab and create a new Google Meet.

2. From the meeting, a window appears asking if you would like to add others to the current meeting. Since you are pre-recording the meeting without any other attendees present, click on the **X** icon to close the window.

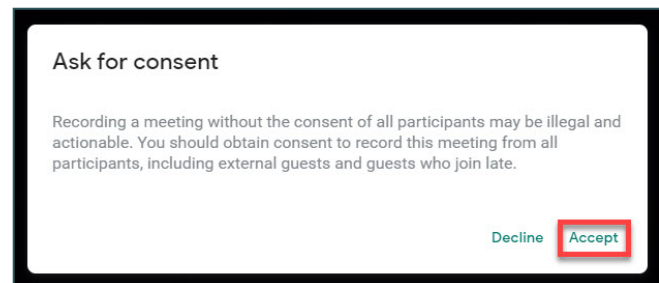

3. In the bottom right corner of the Meet screen, click the **More options** icon (three dots).

4. From the list of items that appear, click **Record meeting**.

5. A dialog window appears to inform you that you should obtain consent from all participants in the Meet before recording. Since you are the only participant in the Meet, click **Accept**.

6. A message appears in the bottom left corner to inform you that the recording will begin soon.

Once this message disappears, a red **REC** icon appears in the top left corner of the screen to show that the recording has begun. This remains until the recording is stopped.

7. If you would like to present at any point while recording, click the **Present now** button at the bottom of the screen, and follow the prompts given to share your screen.

8. When you are finished recording the session, click the **More options** icon again, and select **Stop recording**.

9. A dialog window appears confirming that you wish to stop the recording. Click **Stop recording**.

A message appears in the bottom left corner of the screen informing you that the recording will be saved to your Google Drive.

10. To exit the Meet, click the **Leave call** icon at the bottom of the screen.

11. Close the Google Meet tab and return to your Gmail Inbox.

## *Accessing the Recording in Google Drive*

**NOTE:** It is important to remember that, once you finish recording a Google Meet, it will usually take **at least five minutes** for the recording to become available for use. You will need to wait until the email notification stating that the recording is available arrives *before* you can access the recording in your Google Drive.

1. Once the recorded Google Meet becomes available for use, an email notification is sent to your District Gmail account informing you that the recording has been uploaded to Google Drive.

2. There are **two** ways to access the recording:

### **A) To access via the email notification:**

Open the email from your Gmail Inbox and click **Open in Drive**. This will automatically open the recording in a new tab.

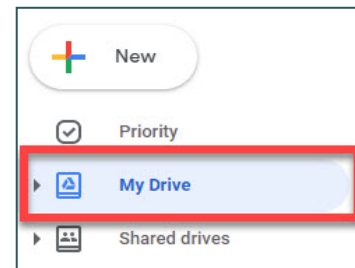

### B) To access via Google Drive:

From Gmail, click the **App Switcher** and select **Drive**.

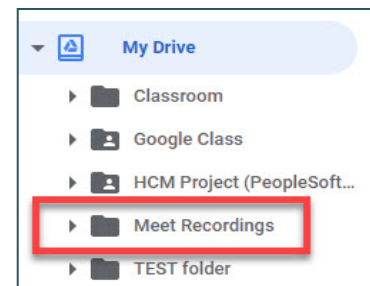

*\* **Please note:** Just as with the Meet app, the location of your Drive app within the App Switcher varies based on your preferences in Google.*

Locate and expand **My Drive** from the panel on the left.

Click the folder titled **Meet Recordings**. (This folder is automatically created in your Google Drive once you record a Google Meet. All other recordings will automatically be stored in this folder in the future.)

Google Meet recordings that you have created appear once you open the folder. To open the desired recording, double-click on the file name.

## Sharing a Recorded Google Meet via Google Classroom

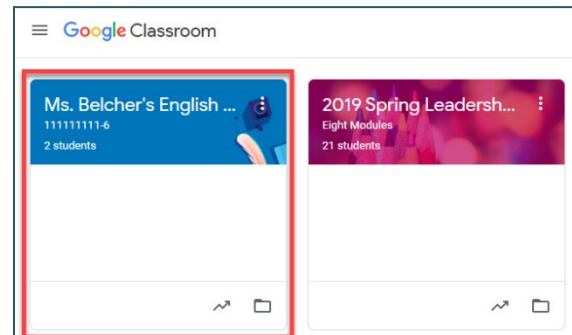

1. Click on the **App Switcher** in the top right corner.

2. From the available apps that appear, locate and click on **Classroom**.

3. The Google Classroom opens in a new tab. Select the desired **Class**.

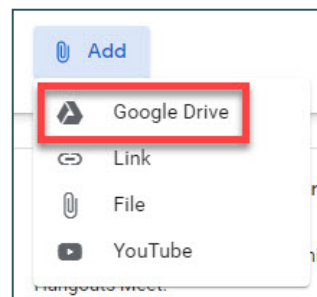

4. From the Class's **Stream** tab, click the **Share something with your class...** button.

5. After adding any desired text to the post, click the **Add** button.

6. Select **Google Drive** from the list of options.

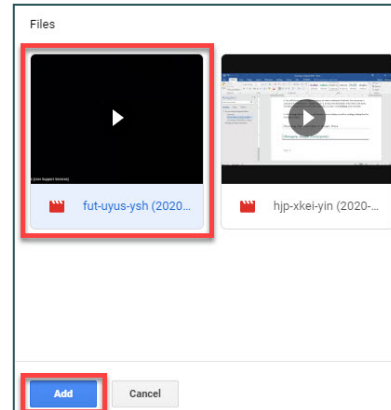

7. In the window that follows, click the **My Drive** tab.

8. Double-click the **Meet Recordings** folder.

9. Select the desired recording and click **Add**.

10. Click **Post**.

## Additional Resources

### Changing the Layout in a Meet

You are able to change the view/layout of the meeting participants in order to fit more participants on the screen at once. The **Change layout** feature can be used to see up to 49 participants at once.

To change the layout in a meeting:

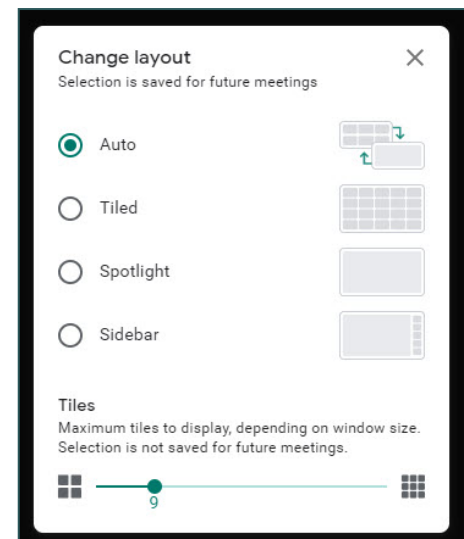

1. While hosting a meeting (using one of the methods outlined in this document), click the **More options** icon (three dots) in the lower right corner.

2. From the menu that appears, select **Change layout**.

3. The **Change layout** window appears. To make a selection, click the **radio button** next to the desired option.

The view options are:

**A) Auto:** This is the default layout setting in a meeting, and allows Google Meet to choose the layout automatically.

**B) Tiled:** This view turns participants' feeds into equal-sized "tiles" (images) on the screen. However, if/when someone is presenting, the screen will display up to three participants alongside the presentation.

**C) Spotlight:** This provides a full-screen layout with the option to display the presentation, active speaker, or participant that you **pin**.

**D) Sidebar:** This shows one main image of a participant or the presentation. Other meeting participants will appear on the right side of the screen.

4. After selecting the desired view from the available options, close the Change layout window by clicking the **X** button in the upper right corner. Once closed, the new layout will be applied.

\* **Please note:** The chosen layout will **only** appear on your screen. It will not be applied to any of the meeting participants' screens. If they wish to change their layout during the Meet, they will need to choose **More Options > Change layout** themselves.

## *Connecting a Document Camera in Google Meet*

During a Google Meet, it is possible to connect a **document camera** (such as an ELMO), which can be especially helpful as an instructional aid when hosting a Meet with students.

To do this:

1. Connect the document/presentation camera to the laptop or computer (being used for Google Meet) via a **USB cable**.
2. Power on the document/presentation camera.
3. Power on the laptop or computer. (Windows 10 should recognize the new device connected via USB and install any drivers that are needed.)
4. Open a **Google Meet** session (using one of the methods previously outlined in this document).

5. From the **Meeting Details** bar at the bottom of the Meet screen, click the **More options** icon (three dots).

5. From the menu that appears, click **Settings**.

6. In the window that follows, select **Video** on the left.

7. Select the **Camera** drop-down arrow. The document/presentation camera should now be a choice that can be selected. (If you would like to use the audio from the camera as well, you can select it from the **Audio** settings option.)

8. The document/presentation camera display can now be shared. (**Note:** The image will appear *reversed* on your screen as the presenter, but will be displayed correctly for all other participants.)

9. To switch back to the main (built-in) camera, go back to the **Meeting Details** bar at the bottom of the screen, and select **Settings** > **Video** > **Camera** drop-down.

## Using Background Blur

The **Background Blur** feature allows you to “blur” the background of your camera’s feed while still allowing yourself to be visible during the Meet. This can be useful if/when you wish to “hide” any distractions behind you while in a meeting, especially if you are teaching or presenting from a remote location rather than a CCSD school or office. An important thing to note is that this feature is **not** available on Chromebooks, and it only works with specific types of video cards.

To utilize this option *before* entering a Meet:

1. From the meeting’s **pre-entry screen**, in the bottom right corner of your camera feed, click the **Background Blur** button (in the lower-right corner) to activate the feature.

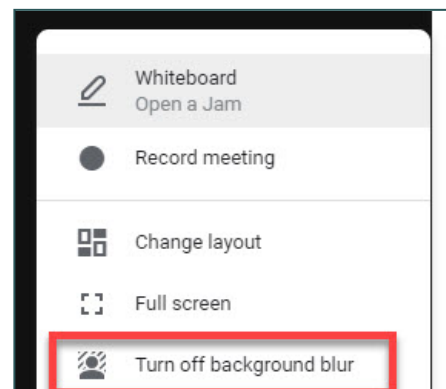

2. Once clicked, the silhouette on the Background Blur button will show a white fill to indicate that the blur feature is **active**. Click **Join now** to enter the meeting.

3. While in the meeting, you may toggle the Background Blur option on/off by clicking the **More options** icon (three dots) in the lower right corner.

*\* **Please note:** Whatever option you choose when you leave the meeting (**ON** or **OFF**), this will be the default setting for Background Blur in the next Google Meet that you join.*

## Using Google Jamboard (Whiteboard)

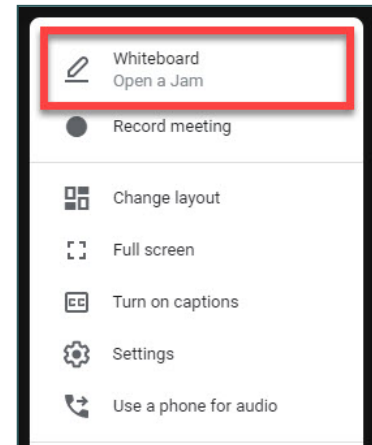

**Google Jamboard** is a digital whiteboarding feature that has been integrated into Google Meet in order to allow you to share a virtual, collaborative “whiteboard” while hosting a Meet. Whiteboards can also be saved, shared, and/or continued at a later time. However, this feature can only be started or opened while on a computer. Invited participants who are using a mobile device or tablet will receive a link to download the Jamboard app on their device.

To use Jamboard during a Meet:

1. While hosting a meeting (using one of the methods outlined in this document), click the **More options** icon (three dots) in the lower right corner.

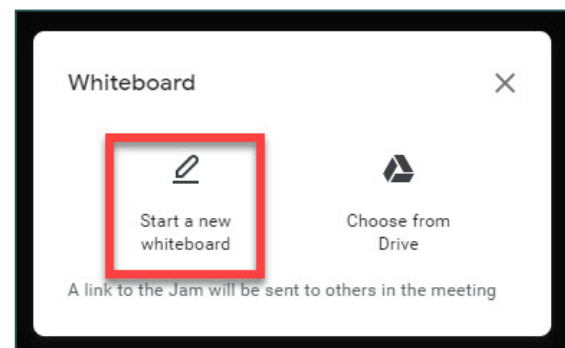

2. From the menu that appears, select **Whiteboard (Open a Jam)**.

3. A dialog box appears asking if you would like to start a new whiteboard or open a saved one from Google Drive. Click **Start a new whiteboard**.

*\* **Please note:** You can only choose a whiteboard from the Drive if you have previously created and saved a whiteboard (or been given access to a saved whiteboard) prior to the Meet.*

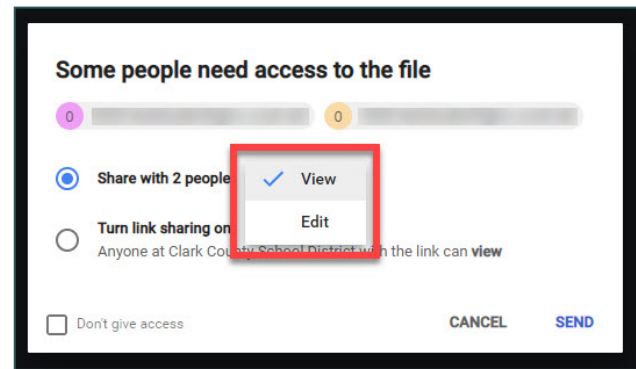

4. A dialog box appears to inform you that the participants in the Meet require access to the new whiteboard. There are two options for sharing the Jamboard file:

**A)** If you plan to present *only* (meaning that your participants will not collaborate on the whiteboard), choose **View**.

**B)** If you would like your participants to be given the ability to collaborate and interact with the whiteboard, choose **Edit**.

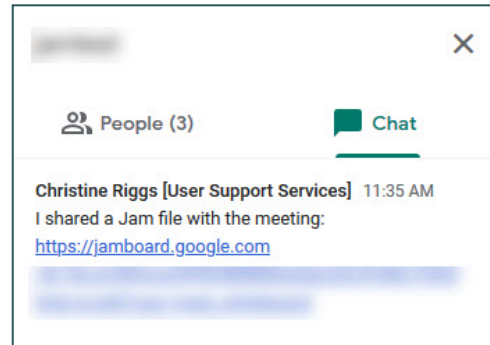

\* **Please note:** It is **not** recommended that teachers provide “Edit” access to students.

5. After you have made your desired selection, click **Send**.

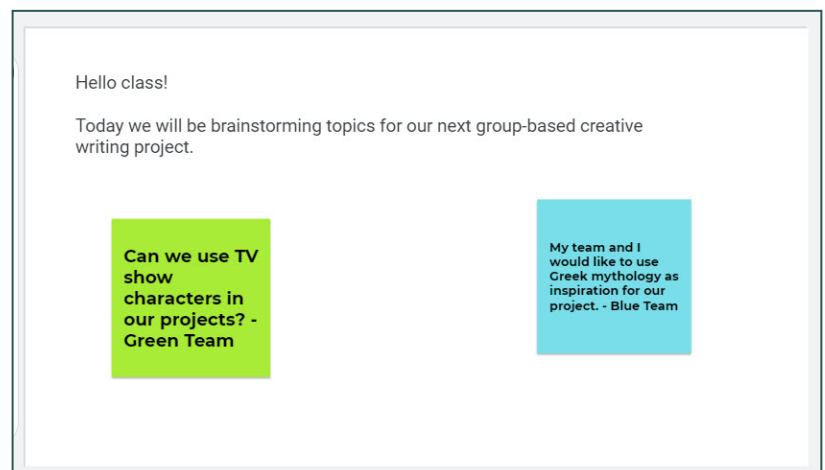

A link to the Jamboard will be posted in the **Chat area**. Participants in the Meet can access the whiteboard by clicking the link.

Each time a meeting participant access the whiteboard, a notification will appear to inform you that they have joined.

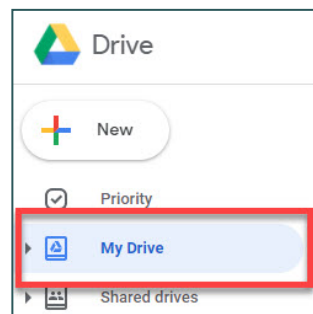

6. After you shared the link, the whiteboard opens for you in a new window. You have the ability to use markup tools (such as a pen, marker, or highlighter), erase items, insert text boxes, add images, add sticky notes, and more while presenting. If your participants have been given **Edit** access, they will have the same rights within the whiteboard.

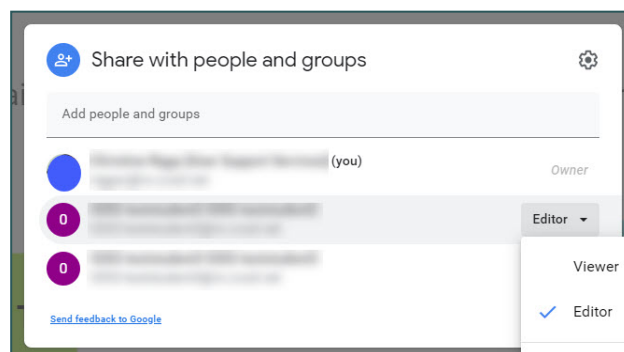

\* For more information on how to effectively use Jamboard for presenting purposes, see the [Google Support Links](#) section.

8. Once finished using the whiteboard, simply close the whiteboard by exiting the new window. This *automatically* saves the whiteboard session to your **My Drive** area in Google Drive, and becomes available to the invited participants in their Google Drives as well.

\* **Please note:** If the participants have been given **Edit** access, they will be able to access and modify the whiteboard presentation from their Google Drive **at any time**. If the participants have been given **View** access, they will only be able to view the contents of the presentation from their Drive.

**Quick tip:** You have the ability to change participants' access to a whiteboard *after* it has been closed and saved to your Google Drive. To do this, open the whiteboard session via Drive (as demonstrated above) and click the **Share** button. From the window that appears, you are able to change the access rights for each of the participants (for example, to change **Editor** rights to **View** rights in order to keep participants from being able to modify the whiteboard after you have closed it).

## Google Support Links

For more information about functionality in Google Meet (such as the Present Now tool, the Chat area, and more), go to **support.google.com** for helpful tutorials and videos from the **G Suite Learning Center**. Use the search area to easily locate help topics.
