Substitute Teacher TRC Protocol

Timesheet Coding Guidance

Time Reporting Codes (TRC) for Substitute Teachers

The proper timesheet TRC depends on the following factors:

Substitute

- the scenario which requires a substitute teacher
- the origin of the substitute teacher
- the school location type
- the time frame for which the substitute teacher is used

Each of the three groupings of TRC in the table below represent a scenario for which a substitute teacher is required. The time reporting codes within the groupings represent various methods a school employs to fulfill that requirement. The first code in each group lists the TRC to purchase a preparation period from a teacher on its faculty to act as a substitute, followed by the corresponding TRCs used to pay a teacher originating from Substitute Services. The appropriate TRC depends on the scenario requiring a substitute teacher, the origin of the teacher used as substitute, the school location type, and the time frame for which the substitute teacher will be employed.

Scenario	Teacher Origin	School Type	TRC	TRC Description
Vacant position (to cover a position that has not yet been filled)	The sub is a school faculty Teacher	Standard	PREPV	Prep Buy - to cover Vacant position
	The sub comes from Substitute Services	Standard	SUBVX	Sub - Vacancy - Xtra Hour
